Wave City, north India's first operational hi-tech city, has launched its premium residential project, Eden.

Eden will feature G+31 storey high-rise towers, with three towers set to launch in the first phase, offering 3 BHK apartments. Spread across 5.2 acres, the project will combine contemporary living spaces with lush green areas and a clubhouse equipped with world-class facilities.

CJ Singh, COO of Wave City, said, "At Wave City, we strive to deliver cutting-edge properties that provide a superior living experience. Eden exemplifies our commitment to modern design, incorporating energy-saving technologies and expansive green spaces to offer tranquility amidst urban life. We are confident this project will mirror the success of our previous luxury ventures, Veridia and Eligo."

The initial launch includes spacious 3 BHK apartments in two configurations, each designed with three open sides to allow ample natural light and ventilation. The project is strategically positioned at the intersection of Wave City's 57m and 62m arterial roads, offering easy access to the 6.5-acre Central Park in Greenwood Enclave and other green spaces within Eden.

Residents will enjoy a host of amenities, including an Olympic-sized swimming pool, fine dining, and multiple recreational options within the clubhouse, ensuring a lifestyle of convenience and luxury.
